# Chapter 1

## Hierarchical Index

### 1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

child	
gr::router::child_impl . . . . .	5
EthernetConnector . . . . .	5
NetworkInterface . . . . .	6
Node . . . . .	6
qa_router . . . . .	6
queue_sink	
gr::router::queue_sink_impl . . . . .	7
queue_sink_byte	
gr::router::queue_sink_byte_impl . . . . .	7
queue_source	
gr::router::queue_source_impl . . . . .	8
queue_source_byte	
gr::router::queue_source_byte_impl . . . . .	7
root	
gr::router::root_impl . . . . .	8
throughput	
gr::router::throughput_impl . . . . .	9
throughput_sink	
gr::router::throughput_sink_impl . . . . .	9

## Chapter 2

# Class Index

### 2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">gr::router::child_impl</a>	5
<a href="#">EthernetConnector</a>	5
<a href="#">NetworkInterface</a>	6
<a href="#">Node</a>	6
<a href="#">qa_router</a>	
Collect all the tests for the gr-filter directory	6
<a href="#">gr::router::queue_sink_byte_impl</a>	7
<a href="#">gr::router::queue_sink_impl</a>	7
<a href="#">gr::router::queue_source_byte_impl</a>	7
<a href="#">gr::router::queue_source_impl</a>	8
<a href="#">gr::router::root_impl</a>	8
<a href="#">gr::router::throughput_impl</a>	9
<a href="#">gr::router::throughput_sink_impl</a>	9

## Chapter 3

# Class Documentation

### 3.1 gr::router::child\_impl Class Reference

Inheritance diagram for gr::router::child\_impl:

#### Public Member Functions

- **child\_impl** (int number\_of\_children, int child\_index, char \*hostname, boost::lockfree::queue< std::vector< float > \*, boost::lockfree::fixed\_sized< true > > &in\_queue, boost::lockfree::queue< std::vector< char > \*, boost::lockfree::fixed\_sized< true > > &out\_queue, double throughput)
- int **work** (int noutput\_items, gr\_vector\_const\_void\_star &input\_items, gr\_vector\_void\_star &output\_items)

The documentation for this class was generated from the following files:

- lib/child\_impl.h
- lib/child\_impl.cc

### 3.2 EthernetConnector Class Reference

#### Public Member Functions

- **EthernetConnector** (int number\_of\_children, int port)
- bool **connect\_to\_parent** (char \*hostname, int port)
- int **write\_parent** (char \*msg, int size)
- int **read\_parent** (char \*outbuf, int size)
- bool **connect\_to\_child** (int index, int port)
- int **write\_child** (int index, char \*inbuf, unsigned long size)
- int **read\_child** (int index, char \*outbuf, int size)
- void **stop** ()

The documentation for this class was generated from the following files:

- lib/EthernetConnector.h
- lib/EthernetConnector.cc

### 3.3 NetworkInterface Class Reference

#### Public Member Functions

- **NetworkInterface** (int itemsize, int children, int port, bool root)
- bool **connect** (char \*parent\_hostname)
- int **receive** (int child\_index, char \*outbuf, int noutput\_items)
- int **send** (int child\_index, char \*msg, int num)

The documentation for this class was generated from the following files:

- lib/NetworkInterface.h
- lib/NetworkInterface.cc

### 3.4 Node Class Reference

#### Public Attributes

- int **socket\_fd**
- int **port**
- sockaddr\_in **address**
- hostent \* **host**
- socklen\_t **length**

The documentation for this class was generated from the following file:

- lib/EthernetConnector.h

### 3.5 qa\_router Class Reference

collect all the tests for the gr-filter directory

```
#include <qa_router.h>
```

#### Static Public Member Functions

- static CppUnit::TestSuite \* [suite](#) ()  
*return suite of tests for all of gr-filter directory*

#### 3.5.1 Detailed Description

collect all the tests for the gr-filter directory

The documentation for this class was generated from the following files:

- lib/qa\_router.h
- lib/qa\_router.cc

### 3.6 gr::router::queue\_sink\_byte\_impl Class Reference

Inheritance diagram for gr::router::queue\_sink\_byte\_impl:

#### Public Member Functions

- **queue\_sink\_byte\_impl** (int item\_size, boost::lockfree::queue< std::vector< char > \*, boost::lockfree::fixed\_sized< true > > &shared\_queue, bool preserve\_index)
- int **work** (int noutput\_items, gr\_vector\_const\_void\_star &input\_items, gr\_vector\_void\_star &output\_items)

The documentation for this class was generated from the following files:

- lib/queue\_sink\_byte\_impl.h
- lib/queue\_sink\_byte\_impl.cc

### 3.7 gr::router::queue\_sink\_impl Class Reference

Inheritance diagram for gr::router::queue\_sink\_impl:

#### Public Member Functions

- **queue\_sink\_impl** (int item\_size, boost::lockfree::queue< std::vector< float > \*, boost::lockfree::fixed\_sized< true > > &shared\_queue, bool preserve\_index)
- int **work** (int noutput\_items, gr\_vector\_const\_void\_star &input\_items, gr\_vector\_void\_star &output\_items)

The documentation for this class was generated from the following files:

- lib/queue\_sink\_impl.h
- lib/queue\_sink\_impl.cc

### 3.8 gr::router::queue\_source\_byte\_impl Class Reference

Inheritance diagram for gr::router::queue\_source\_byte\_impl:

## Public Member Functions

- **queue\_source\_byte\_impl** (int size, boost::lockfree::queue< std::vector< char > \*, boost::lockfree::fixed\_size< true > > &shared\_queue, bool preserve\_index, bool order)
- int **work** (int noutput\_items, gr\_vector\_const\_void\_star &input\_items, gr\_vector\_void\_star &output\_items)

The documentation for this class was generated from the following files:

- lib/queue\_source\_byte\_impl.h
- lib/queue\_source\_byte\_impl.cc

## 3.9 gr::router::queue\_source\_impl Class Reference

Inheritance diagram for gr::router::queue\_source\_impl:

## Public Member Functions

- **queue\_source\_impl** (int size, boost::lockfree::queue< std::vector< float > \*, boost::lockfree::fixed\_size< true > > &shared\_queue, bool preserve\_index, bool order)
- int **work** (int noutput\_items, gr\_vector\_const\_void\_star &input\_items, gr\_vector\_void\_star &output\_items)

The documentation for this class was generated from the following files:

- lib/queue\_source\_impl.h
- lib/queue\_source\_impl.cc

## 3.10 gr::router::root\_impl Class Reference

Inheritance diagram for gr::router::root\_impl:

## Public Member Functions

- **root\_impl** (int number\_of\_children, boost::lockfree::queue< std::vector< float > \*, boost::lockfree::fixed\_size< true > > &in\_queue, boost::lockfree::queue< std::vector< char > \*, boost::lockfree::fixed\_size< true > > &out\_queue, double throughput)
- int **work** (int noutput\_items, gr\_vector\_const\_void\_star &input\_items, gr\_vector\_void\_star &output\_items)

The documentation for this class was generated from the following files:

- lib/root\_impl.h
- lib/root\_impl.cc

## 3.11 gr::router::throughput\_impl Class Reference

Inheritance diagram for gr::router::throughput\_impl:

### Public Member Functions

- [throughput\\_impl](#) (size\_t itemsize, int print\_counter, int index)
- int [work](#) (int noutput\_items, gr\_vector\_const\_void\_star &input\_items, gr\_vector\_void\_star &output\_items)

### 3.11.1 Constructor & Destructor Documentation

3.11.1.1 gr::router::throughput\_impl::throughput\_impl ( size\_t *itemsize*, int *print\_counter*, int *index* )

This is the private constructor for the throughput block

Parameters

<i>itemsize</i>	The size (in bytes) of the data being measured
<i>print_counter</i>	The number of <a href="#">work()</a> calls between prints of throughput value
<i>index</i>	How many tabs in front of the throughput value to space them

### 3.11.2 Member Function Documentation

3.11.2.1 int gr::router::throughput\_impl::work ( int *noutput\_items*, gr\_vector\_const\_void\_star & *input\_items*, gr\_vector\_void\_star & *output\_items* )

This is the throughput

Parameters

<i>noutput_items</i>	The number of data samples
<i>&amp;input_items</i>	
<i>&amp;output_items</i>	

The documentation for this class was generated from the following files:

- lib/throughput\_impl.h
- lib/throughput\_impl.cc

## 3.12 gr::router::throughput\_sink\_impl Class Reference

Inheritance diagram for gr::router::throughput\_sink\_impl:

### Public Member Functions

- **throughput\_sink\_impl** (size\_t itemsize, int print\_counter, int index)
- int **work** (int noutput\_items, gr\_vector\_const\_void\_star &input\_items, gr\_vector\_void\_star &output\_items)

The documentation for this class was generated from the following files:

- lib/throughput\_sink\_impl.h
- lib/throughput\_sink\_impl.cc
